Detailed Action

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-5 and 8-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Kobayashi et al.

With respect to claim 1, Kobayashi teaches an image processing apparatus comprising: rendering means for rendering data in a first color space (RGB) and data in a second color space (CMYK), see input color conversion unit 1,; and a plurality of image forming means (ink reservoirs CMYK from printer 27).

Art Unit: 2626

With respect to claim 2, see figure 1.

With respect to claim 3, see the output of the conversion unit 1, provided in figure 1.

With respect to claim 4, Kobayashi teaches conversion means 1 for converting the data in to the first color space (RGB) into data in the second color space (CMYK) and wherein said image forming means (printer 27) forms an image based on one of data rendered in the second color space by said rendering means and data converted by said conversion means. See units 24-26 of figure 5 or element 6 of figure 1.

With respect to claim 5, see figures 4B -4D.

With respect to claim 8, Kobayashi teaches rendering a plurality of color data of a first color space (RGB) into a second color space (CMYK) according to figure 1.

With respect to claim 9, see col. 9, lines 52-63.

Art Unit: 2626

With respect to claim 10, Kobayashi teaches the rendering step (rendered by the input portion of unit 1), the second color space (rendered by the output portion of unit 1); and the image forming step via printer 27. See also figure 27.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Claim 11 is rejected under 35 U.S.C. 102(e) as being anticipated by Shimizu.

With respect to claim 11, Shimizu teaches a storage medium ROM 22 storing a program which comprises: a code of the step of rendering data in a first color space (CMYK) and data in a

Art Unit: 2626

second color space (Lab); and a code of the step of forming images of the rendered image data in units of color (via printer 41 see figure 10).

Claims Objected To As Containing Allowable Subject Matter

3. Claim 6, 7 and 12-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
